

In God's love we believe and achieve

St. Michael's

Catholic Primary School

Computing Policy

Statement of intent

At St Michael's we intend to provide a computing curriculum that strives to create opportunities for children to access a high quality computing education which equips them to be able to use computational thinking and creativity, enabling them to be good 21st Century global citizens. We aim for our children to be confident, competent and discerning users of digital technology, which will prepare them for participation in a rapidly changing world; including programming, creating media and utilising online programs and software.

'The National Curriculum 2014' ensures that all pupils:

- Can understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation
- Can analyse problems in computational terms, and have repeated practical experience of writing computer programs in order to solve such problems
- Can evaluate and apply information technology, including new or unfamiliar technologies, analytically to solve problems
- Are responsible, competent, confident and creative users of information and communication technology.

Legal framework

This policy has due regard to all relevant legislation and statutory guidance including, but not limited to, the following:

- DfE (2013) 'Computing programmes of study: key stages 1 and 2'

This policy operates in conjunction with the following school policies:

- Social Media Policy
- Online Safety Policy
- Assessment Policy

Roles and responsibilities

The Headteacher will:

- Ensure that there is a Primary Computing Policy in place, and that it is regularly reviewed and updated to take into account new developments, both to the primary computing curriculum and to ICT.
- Ensure that the Primary Computing Policy, as written, is disseminated to the computing coordinator, teaching staff and parents, for implementation.
- Hold the computing coordinator to account for the effective implementation of the Primary Computing Policy, including budget expenditure.
- Intervene where it is apparent that the Primary Computing Policy is not being implemented according to its provisions.

The computing coordinator will:

- Manage the computing budget, and keep appropriate records of expenditure in order to review them and make suggestions for the future.
- Secure and maintain computing resources, and advise staff on the correct use of digital technologies.
- Offer help and support to all members of staff in their planning, teaching and assessment of computing.
- Keep the Headteacher and other stakeholders, such as parents, informed about the implementation of the primary computing curriculum.
- Keep up-to-date with new developments in computing and communicate such information and developments to colleagues, including, where necessary, through the creation and delivery of bespoke training programmes.
- Attend appropriate in-service training.

Teachers will:

- Plan and deliver the requirements of the KS1 and KS2 computing programmes of study to the best of their abilities.

- Set high expectations for all their pupils, including pupils with special educational needs and/or disabilities (SEND), pupils from various social, cultural and linguistic backgrounds, and academically more able pupils.
- Encourage pupils to apply their knowledge, skills and understanding of computers and ICT across the curriculum.
- Maintain up-to-date records of both formative and summative assessment.
- Tailor lesson delivery according to pupils' respective abilities.

EYFS

Although computing is not a statutory part of the EYFS, we will ensure that children of reception age receive a broad, play-based experience of computing through the use of new technologies.

KS1

Pupils will be taught to:

- Understand what algorithms are, and how they are implemented.
- Create and debug simple programs.
- Predict the behaviour of simple programs.
- Create, organise, store, manipulate and retrieve digital content.
- Recognise common uses of ICT beyond school.
- Use technology safely and respectfully, keeping personal information private, and to identify where to go for help and support when they have concerns online.

KS2

Pupils will be taught to:

- Design, write and debug programs that accomplish specific goals, including controlling or simulating physical systems, and solving problems.
- Use sequence, selection, and repetition in programs.
- Work with variables and various forms of input and output.

- Explain how some simple algorithms work, and how they can detect and correct errors.
- Understand computer networks, how they can provide multiple services, and the opportunities they offer for communication and collaboration.
- Use search technologies, understand how results are selected and ranked, and be able to critically evaluate digital content.
- Select, use and combine a variety of software on a range of devices to design and create programs, systems and content that accomplish specific goals.
- Use technology safely, respectfully and responsibly, recognise acceptable behaviour and identify a range of ways to report online concerns.

Curriculum delivery

Teaching of digital literacy and ICT is largely delivered through cross-curricular subject links.

The core requirements of the KS1 and KS2 computing programmes of study, such as coding/programming, will be delivered through the MGL, our personalised curriculum and the Teach Computing scheme of work, during a dedicated weekly computer lesson.

We have acquired 12 desktop computers, 44 laptops and 80 tablets to support the delivery of the primary computing curriculum.

An audit of resources is taken on an annual basis to ensure that our computing provision remains appropriate to the latest requirements of the KS1 and KS2 primary computing programmes of study.

Web filters are kept up-to-date in order to ensure that pupils don't access inappropriate materials.

Obsolete or broken machines are sold, repaired or, where repair is not possible or cost-effective, scrapped in accordance with data protection requirements.

A service level agreement (SLA) with MGL is in place to support the computing coordinator to fulfil this role.

An SLA with our broadband provider is in place, and all computing-related devices and related applications have access to the internet. This SLA will be

reviewed on 18/4/22 to ensure that the current package remains sufficient for purpose, and that it continues to represent the best value for money.

Differentiation

We provide suitable learning opportunities for all pupils by matching the challenge of the task to the individual needs and abilities of each pupil. We will achieve this in a variety of ways, including:

Grouping pupils by ability and setting different tasks for each ability group.

Making reasonable adjustments to the way in which we deliver the computing curriculum, such as providing transcripts of online learning videos to pupils with hearing impairments, or making resources available in a pupil's first language where they use English as an additional language.

Assigning classroom assistants to individual/groups of pupils, where appropriate, to enable greater one-to-one support.

Assessment

Pupils' knowledge and understanding of the primary computing curriculum will be assessed according to the provisions outlined in our Assessment Policy.

Ongoing formative assessment monitors pupil performance and progress during learning; the outcomes of which we will use to ensure that work matches the individual needs and abilities of pupils.

Summative assessment reviews pupils' progress and abilities, and will be undertaken at the end of each unit, term and school year via a number of means, including but not limited to:

Portfolios.

End of year tests.

KS1 and KS2 national curriculum tests.

Samples of work will be kept for groups of children, stored in both classrooms and on the school network, within relevant class and pupil folders.

Staff training

The computing coordinator will be responsible for the identification and delivery of staff training requirements.

Staff training requirements will be met by:

Auditing staff skills and confidence in the use of computers and ICT on a termly basis.

Arranging top-up training for individual staff members as required.

The computing coordinator will remain up-to-date with the latest developments in computing through subscriptions to relevant journals, attendance at relevant courses, etc., and will pass on any newly acquired knowledge/skills to staff members, where appropriate.

Monitoring and evaluation

We appreciate that computers and ICT are rapidly developing, with new uses and technology being created all the time.

We will review this policy on an annual basis. We will review our web filters on an annual basis in order to ensure that pupils continue to be protected from inappropriate content online.

The policy will be reviewed by the Governing body annually and will be signed by Mike Volynchok Chair of Governors on behalf of the governing body.
